Fitness Class Description

Aqua Aerobics: Tone and sculpt your body with no impact on your joints. This popular water aerobics workout is a blend of cardio and resistance training. We may incorporate resistance tools such as water weights and pool noodles.

Lift and Core: Lift and Core is a series of high-repetition, low-weight exercises performed using a barbell and a selection of weight plates. Each lift and core class has a warm-up, several strength-training tracks, and a cool-down at the end. There will also be a focus on the core, abs and back muscles as part of this class.

Step and Sweat

An energetic workout involving step routines that are designed to give you a terrific lower body workout as well as all the benefits of a regular aerobics class. A great cardio class guaranteed to get you moving and sweating. Dumbbells can be added for extra toning.

Sunrise Spin: Sunrise Spin is a great way to start the day. A steady Spin Class with plenty of climbs and a few sprints thrown in for good measure.

HIIT Spin: This Spin Class *will have you sweating and get the blood pumping*. Fun and effective way to exercise on an indoor bike, especially if you're short on time or want to maximize your results with less time spent.

Bike and Build: This class is a full body cardio and strength class. Get a great burn as you complete 30 min of sprints, standing climbs paired with 15 min of fully body weight training.

Total Body Conditioning: Body conditioning classes are a great way to achieve muscular endurance. These classes combine a range of barbell, dumb bell and kettlebell exercises to increase all round fitness and strength.

Super Seniors: This class is aimed at our more senior members and has been specifically designed to combined gentle cardio exercises with strength and conditioning movements for a full body workout.

Push and Lift: Push and Lift consist of high-repetition, low-weight exercises performed using a barbell and a selection of weight plates to upbeat music. Each Push and Lift class has a warm-up, several strength-training tracks, and a cool-down at the end.

Chair Fit: A chair yoga class designed to make yoga accessible for seniors, beginners, or anyone with limited mobility by adapting traditional yoga poses to be performed while seated or with the support of a sturdy chair. The environment is gentle, inclusive, and focused on safety and comfort.

Super Circuits: A modern twist on the tried and tested circuit training class. A great calorie burner designed to develop all round fitness. This class is you against the clock as you rotate through several stations combining bodyweight exercises, HIIT exercises and weight-based exercises to get you in great shape.

Stretch and Flex: Flexibility and mobility are important aspects of training and recovery that will keep you moving efficiently and without pain. Our stretch and flex class will leave you feeling rested, restored and ready to crush your next workout.

Cross Training: Cross training is an all-round exercise class combining elements of cardio and strength training. It is an approach to training that draws from a variety of disciplines to create a workout that is both productive and effective.

A.M.R.A.P.: AMRAP stands for "as many rounds or reps as possible," depending on how the workout is structured. In a class, that usually means you either repeat a short circuit (rounds) or perform maximum repetitions of specific moves before time is up. AMRAP classes build muscular endurance, cardiovascular fitness, and mental toughness because you work with very little rest.

Ass and Abs: Squat, lunge, crunch repeat for a serious workout that does what it says on the tin. Expect to feel the burn and to tone up both your ass & abs!
